

YASH YADAV

SOFTWARE ENGINEER

WORK EXPERIENCE:

MAQ SOFTWARE PVT. LTD.

Software Engineer

Apr 2019 - Present

- > Refined the backend of a Webapp with microservices architecture and latest cloud native Azure technologies.
- > Developed Azure functions and Webjobs integrated with NoSQL CosmosDB for background processes.
- > Created and improved CI/CD pipelines for seamless deployments
- > Managed Email marketing infrastructure with Salesforce Marketing Cloud

ODESSA TECHNOLOGIES PVT. LTD.

Software Development Intern

Aug 2018 - Dec 2018

- > Improved the Odessa Build platform
- > Profiling for performance optimizations in Lease Wave.

ACADEMIC BACKGROUND:

LOVELY PROFESSIONAL UNIVERSITY

Bachelor's Degree / Computer Science & Engineering

2015-19

GPA- 8.7/10

- > Member of 'Cypher' - Competitive programming focused organization
- > Volunteered in 'One India' - Yearly hosted Cultural campus event

2017

PROJECTS:

Email Platform

May 2020 - Present

Email platform born as a side project during the pandemic lockdown, also serves the Bi-Weekly information newsletter: "Knowledge•Day". Supports:

- > Flexible HTML + CSS rich templates
- > Dynamic Email content generation

Open Source Contribution: Gnome Usage

March 2019

Fixed graph-stack-switcher bug which would prevent adding more than two sub views in gnome Usage application performance tab.

More

- > Hybris Port for YU5510 - Kernel configs, Mer, BASH
- > Finance Management System - Python, Firebase
- > Image Stitching Software - C++, OpenCV

*March 2020
May 2018
November 2017*

PROFILE SUMMARY:

Linux and opensource hobbyist. Driven by problems that encourage out-of-the-box thinking.
I also love to write, travel, and listen to music.
