Projects

Email Platform

May 2020 – Present

Email platform born as a side project during the pandemic lockdown, also serves the Bi-Weekly information newsletter: "Knowledge•Day".

Supports flexible HTML templates and dynamic Email content generation. With social network integration in the making.

Open Source Contribution: Gnome Usage

March 2019

Fixed graph-stack-switcher bug which would prevent adding more than two sub views in gnome Usage application performance tab.

More.

Hybris Port for YU5510 – Kernel configs, Mer, BASH
Finance Management System – Python, Firebase
Image Stitching Software – C++, OpenCV

Personal

Interests: Drums, German language, Humor, Blogging
